Title of Your Paper

Your paper must be typed and limited to no more than three pages, not including the cover page or reference page. The paper should be thorough, organized, and utilize correct grammar and sentence structure. Evidenced-based practices must be referenced as well as any other resource used for the paper. There must be at least three current references used, none of which can be your textbooks.

There are several purposes for this paper. One purpose is to ensure you your can explore the vast information available and discern what is needed to make your group’s position and/or what your group has discounted and why. Another purpose is to explore one of many current events or topics that may affect you as nurse and how to come to a position after review of the fact. The final purpose of the paper is to develop your team skills and group dynamics as you will soon be thrust into a world with multiple disciplines and multiple levels of education or experience within the nursing discipline. Of course, there are additional learning strategies associated such as the skill of composing a formal paper in a professional format.

At the end of this exercise, you will have an opportunity to do a peer critique on the members of your group and yourself with complete anonymity. You will be asked to professionally critique the overall level of teamwork of each individual, the level of research participation of each individual, the level of motivation demonstrated by each individual, and the level of conflict resolution (if any) of each individual.

Please use this format to guide you in the format for the paper. If you need further guidance, I have included a website that may provide the information.
