**Nursing 100 – Medication Mathematics**

I. **Course Description:**

This course focuses on those components of safe medication calculation and administration. The emphasis is on accuracy of calculation and the critical thinking involved in client/patient safety. This is an intense class on med math calculations that is required of all RN majors. Clinical application is integrated into the clinical nursing courses.

II. **PREREQUISITES, if any:**

1. English 101
2. Demonstration of Math Competency
3. Demonstration of Reading Competency
4. Psych 101
5. Biology 204 (BIOL 204) and Biology 206 (BIOL 206) or Biology 200 (BIOL 200) and Biology 202 (BIOL 202)
6. Biology 220 (BIOL 220) General Microbiology
7. Permission of Instructor

COREQUISITES, if any:

1. Nursing Process I (NURS 110)
2. Nursing Skills Lab I (NURS 111)
3. Nursing Process Application I (NURS 112)
4. Introduction to Sociology (SOC 101) or Cultural Anthropology (ANTH 102)
5. Permission of Instructor

III. **Course Objectives:**

1. Calculate basic mathematic problems including addition, subtraction, multiplication & division of fractions & decimals.
2. Convert metric, apothecary and household measures accurately.
3. Solve dosage problems using dimensional analysis
5. Calculate intravenous flow rates.
6. Interpret drug orders and labels relevant to the safe administration of drugs.
7. Discuss the “Six rights” of clients relative to administration of medications.
8. Describe the routes of administration.
IV. Specific Course Information

1. The passing course grade is 75%.
2. Exams will be given periodically during the course. Exams will count for 70% of the final grade.
3. Mini-quizzes will count for 5% of the grade.
4. Final exam will count for 25% of the grade. The Final Exam must be passed with a 75%.
5. Nursing Course grades are based on the following scale (not rounded)
   - A= 92-100%
   - B= 83-91%
   - C= 75-82%
   - D= 68-74%
   - F= Below 68%

Drug Dosage Calculation

Description:
This class will present the dimensional analysis method as a tool to use in solving all drug dosage calculation problems.

Unit Outcome Competencies:
The student will practice problems in class, in the Nursing Learning Center and at home to develop proficiency in calculations.

Student Learning Outcomes:
Upon completion of this class the student will be able to:
1. Calculate drug dose problems correctly with 92% accuracy as measured by a post-test on the first attempt in second semester.
2. State the six rights of medication administration.
3. Calculate the flow rate of a simple primary intravenous line in ml/hr or drops/min as measured by one question on the final exam with a class average for the measured question at 100%.
4. Pass a comprehensive final exam on dosage calculations at 75% including critical care and pediatric problems.

Student Learning Activities:
To assist in learning the content the student will:
1. Complete problems in the assigned references
2. Complete problems on the assigned study guides
3. Complete problems on the CAI
