

24. How do I find out about the transfer requirements of any particular school?

Information for transfer students is published in the catalog (either printed or online) of any institution. The Transfer Center has an extensive library of catalogs and supplementary material that is sent to us from universities all over the country. There is also a computer lab available for you to use to access a particular school's web site online. Transfer Center staff is available to assist you in locating and using these resources. In addition, a number of universities send representatives to the annual Transfer Day/College event that is held in early October. Some of those representatives also visit IVC on a regular basis to meet with students individually. See the [Colleges/Universities Representatives](#) page of this web site for the latest schedule of visits.
